

Germs Are Icky **&** **Lice Aren't Nice**

October 1st, 2009

Dear Discovery Families~

In an effort to reduce the spread of germs and lice, we are switching to using personal headphones for our computer lab and classroom computers (instead of using community headphones). If you are receiving this letter, your classroom teacher uses headphones in the computer lab and/or their classroom to allow a quieter environment for students to work on their technology lessons and activities.

Please purchase an inexpensive headphone set, place them in a large zip lock baggie, and send them to school ASAP. Please CLEARLY label both the headset and the baggie with your child's name.

If you are not able to purchase a headset at this time, please let your teacher know, as scholarships are available.

Thank you for helping us reduce the spread of germs and lice at Discovery!

Tera Coyle
Principal
Discovery Elementary
